

Join your business community and benefit from

Improved air quality

Less noise in your area

Fewer vehicles on your street

Less time spent on supplies management

Minimum 20% cost saving on office supplies

Better recycling rates for London

Will this work?

The approach was trialled on Bond Street and we found* that there was:

94% reduction in daily waste and recycling vehicle movements from 144 to nine a day

17% reduction in kerbside vehicle stops

67% reduction in waste bags on the footways

Reducing vehicles in Mayfair

New West End Company, and West End property owners are teaming up to increase recycling, reduce traffic and improve air quality in the West End & Mayfair.

Every day thousands of delivery and waste collection vehicles enter London's roads. In Westminster it is estimated that 40 different companies collect waste alone.

We have carefully selected three suppliers that can provide waste and recycling collection and business supply services. The more companies that use the same suppliers means fewer vehicles in our district and better air quality for all. Consolidating suppliers will also bring cost benefits for businesses.

How to sign-up

This will be the biggest project of its kind in London and we need you to participate in three simple steps:

- 1 Check who is collecting your waste and recycling and providing your business supplies
- 2 If it is not Westminster City Council, First Mile or Anglo, contact the suppliers (in the right panel) or New West End Company at placemaking@newwestend.com
- 3 Have your current business supplies and waste and recycling contracts to hand and await a call from the preferred suppliers

Why are we recommending these suppliers?

They already work in the West End and aim to match the prices of your existing suppliers. By switching supplier it should not cost you any more.

We've confirmed that their recycling levels are high and they use cleaner, less polluting vehicles.

None of their waste goes to landfill – anything that cannot be recycled is used to produce energy.

Get even more

FREE

Businesses that sign up to Anglo business supplies and also a preferred waste and recycling supplier will be able to access a FREE personal deliveries consolidation service, using electric vehicles, for three months.

As more and more people have personal goods delivered to their work, this service can make a big difference to the number of vehicles in central London. The approach was trialled by Grosvenor at its head office which found it reduced deliveries from approximately 12 a day down to just one a day.

Who are the preferred suppliers?

first mile

easy recycling

Commercial waste & recycling

First Mile collects waste and recycling for over 3500 businesses in the West End.

They are specialists in a range of recycling, working with businesses of all sizes.

First Mile offer zero emission next day deliveries of sacks and a daily, low cost reliable collection service for all types of waste with no contract or hidden fees.

For further details get in touch at

customers@thefirstmile.co.uk or 0800 612 9894.

City of Westminster

Commercial waste & recycling

Westminster City Council Commercial Waste Services (CWS) provides waste services to businesses on a statutory and not-for-profit basis with any income used to cover costs and invested in service provision for the local community.

For further details get in touch at

commercialwaste@westminster.gov.uk or 020 7641 6180.

Business supplies

Business can benefit from Anglo's zero emission deliveries, vast product and service ranges, and significant savings through exclusive pricing.

We encourage businesses to find out more about Anglo and how it can supply your business. It offers supplies in forty business categories and thousands of product lines.
